CHILD SAFETY GUIDELINES

In accordance with The European Standard EN 13120: 2014, the following restrictions will apply in relation to any window blinds operated by chain/cord.

At the time of order, please ensure you provide width, drop & installation height (distance from floor to the point at where the brackets are to be fitted).

Installation Height	Chain/Cord System	Control Length Restriction
Known Installation Height	Tensioned	Max control length allowed is installation height minus 1.5m
	Breakaway	Max control length allowed is installation height minus 600mm
Unknown Installation Height	Tensioned	Blinds up to 1m drop, max control length allowed is 2/3 of drop
		Blinds up to 2.5m drop, max control length allowed is 1m
		Blinds greater than 2.5m drop, max control length allowed is drop minus 1.5m
	Breakaway	Max control length allowed is 2/3 of drop

Please note that Smartshade products operated by chain (Roller/Cassette/Vertical/ Double Roller/ Roman), will use a continuous fixed tension chain loop as standard. The above rules will be applied, and our system will automatically choose an equal chain loop or the next lowest chain loop available. Below are the chain loop lengths that are used for Smartshade products operated by chain:

500mm	750mm	1000mm
1250mm	1500mm	1750mm
2000mm		

The above continuous chain loops are available in the following colours:

Anthracite Plastic	Cream Plastic	Chrome Metal
Black Plastic	Grey Plastic	Brass Metal
Brown Plastic	White Plastic	Antique Brass Metal

ALTERNATIVE CHILD SAFE OPTIONS

All our blinds are supplied with child safety devices, but for added Child Safety please see below alternatives as there are many options that don't have cords or chains:

- Automated Blinds (Roller/Vertical/Roman/Honeycomb/ Double Roller)
- Honeycomb - Tensioned
- Vertical – Wand control
- Perfect Fit - Glide System
- Curtains
